RAYA
BLADE 
PRECISION IN EVERY CUT

ABOUT US

Who are we?

Raya Blade is a manufacturer of high-precision industrial knives based in Turkey, serving demanding industries across Europe.

We provide reliable and cost-effective cutting solutions for sectors such as food processing, packaging, and paper converting.

Our products are manufactured using certified high-quality steels and precise heat treatment processes to ensure long service life and consistent performance.

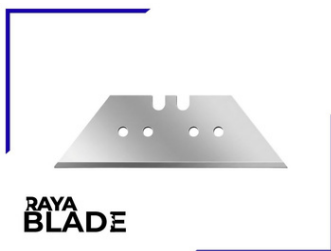

In addition to standard products, we offer custom blade manufacturing based on technical drawings or samples, tailored to your specific applications.

FOOD PROCESSING BLADES

Engineered for maximum hygiene and performance, our food-grade stainless steel blades offer superior corrosion resistance and long-lasting sharpness. Designed to meet the highest safety standards, Raya Blade solutions ensure clean, precise cuts while minimizing product waste in all food processing lines.

- Circular blades
- Slicing blades
- Portioning blades

We manufacture all types of industrial blades according to your technical drawings.

PAPER & CARDBOARD BLADES

Specially engineered for the paper and cardboard industry, our blades deliver dust-free, high-precision cuts for corrugated boards, tissue paper, and specialty stocks. Crafted from premium tool steels with advanced heat treatment, Raya Blade products provide exceptional wear resistance and extended service life even under heavy-duty operations.

- Circular knives
- Guillotine blades
- Shear blades

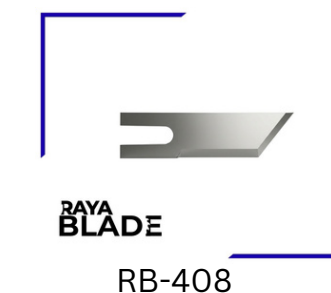

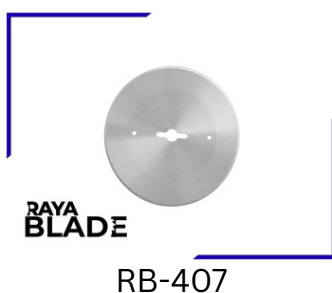

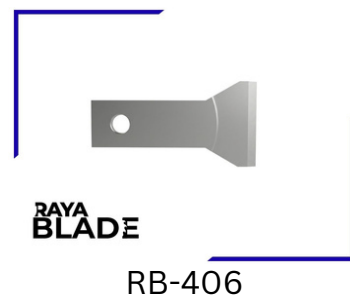

We manufacture all types of industrial blades according to your technical drawings.

TEXTILE CUTTING BLADES

Precision-engineered for the textile industry, our blades provide zero-error cutting for a wide range of materials from delicate silks to technical fabrics. With advanced grinding technology and razor-sharp edges, Raya Blade ensures clean, fray-free edges and high-speed performance for all your industrial cutting needs.

- Rotary blades
- Straight knives

We manufacture all types of industrial blades according to your technical drawings.
